6. Aloe Barbadensis gel (aloe vera gel)
7. Tocopherol acetate (Vitamin E)

Nappy Review says... We like the fact that you have a choice between the tub or refill pack as the refill pack comes with a handy re-sealable opening. The price is quite high though BUT it is an all-natural product, so you know that baby will not get a bad reaction from using these wipes. I've used them on my daughter and have never had any issues. PLUS if you don't like fragrances either, these are a good choice! Other Mums say... Rachael, from Werrabee says..."There are no better wipes on the market. Yes they are expensive but the price doesn't compare to the redness or soreness that other wipes cause to my baby's delicate bottom. I have tried every baby wipe available and Seventh Generation Baby Wipes are the most safest available. In fact my son has never had a red bottom whilst using these wipes." Where to Buy ONLINE at Skin Organics Online, TUB \$11.50, Refill Pack \$10.50
