Baby BeeHinds

Baby BeeHinds Type of Nappy Fitted Nappy with snap fasteners Sizes

One size fits all (birth to training) Features

* Baby Beehinds are available in either hemp or bamboo and in day-time or night-time absorbency

* Snap-in boosters are great for quick-drying

* One booster is longer to enable custom-folding depending on the sex of your bub

*Elasticated leg openings for extra comfort and security Absorbency Available in night-time and day-time absorbency - The night-time nappy comes with a micro-fleece lay-in liner for extra dryness Booster Yes - two snap-in boosters for the night-time nappy Cover No - the Baby Beehinds require a cover - they recommend wool or PUL Value-for-Money This is a one-size nappy and will fit from birth to training so it's great value as you don't need to constantly upgrade your nappies to the next size. Nappy Review says... I use the Baby BeeHinds bamboo nappy on my one year old. She is 12 kilos and the nappy is still one snap from the tightest position. Even though it is a night nappy I usually use it during the day without the micro-fleece liner so it's not so bulky. The wool covers recommended by Baby BeeHinds are great for winter (in Qld) but in summer I find they're too hot. Other Mums say...

Sheree says: "These nappies are fantastic and the best I've used. They are made of hemp or bamboo so they are very absorbent. They are fitted with snap closures and grow with bub. They come with snap in boosters so they are suitable for day and night use depending on how many boosters you use. They are lovely and soft even off the clothesline and the hemp and bamboo are un-bleached and natural for those sensitive bubs. They are suitable for heavy wetters. They require a cover and the Baby Beehinds ones again are very suitable - they have different covers for different needs, day and night. The R.R.Price is \$25.00 - well worth the money as you don't need to buy different sizes. Price \$25 Where to Buy Baby BeeHinds
